

Magazine Cover Project

You are to design the cover of a new magazine or a magazine that already exists. **Make sure that each element of your magazine is on its own layer.*** Include the following on your cover:

- Name of Magazine
- Date
- Price
- Mailing Label - use your name and use the school address, Eisenhower MS, 344 Calvin Ct., Wyckoff, New Jersey, 07481
- Bar code

You may include a photo or photos you have taken along with images from the Internet. To start the project you will create a new document in Photoshop Elements by going to the File Menu and selecting New. A dialog box like the one below will appear. Make sure you have the following measurements for this new document:

- Width is 8.5 inches
- Height is 11 inches
- Resolution is 150 pixels/inch

* Reminder

Be sure to use the layers palette and create new layers for each element of your magazine cover.

When you paste an image into your magazine cover or start a new text area the program

automatically creates a new layer. When you are creating your barcode and mailing label be sure to make new layers for each. Having things on different layers will make it easy to revise the design of your magazine cover.
